

# Installation and Service Contractor Training

**When:**

Wednesday May 17  
8:00 AM – 11:00 AM  
*Breakfast Included*

**Where:**

ThermalNetics Training Center  
3955 Pinnacle Court  
Auburn Hills, MI 48326

This FREE training is eligible for 3 Continuing Education Units (CEU)

**Target Audience:** Installation and Service Contractors

**Topics:**

- Installation, maintenance, replacement and troubleshooting
- Benefits of ECM fan module technology in retrofit applications
- Application of ECM fan module systems in critical applications
- Q-PAC offering specifics, including “kitted” system of engineered plug-and-play wiring harnesses, pre-engineered fan array bulkhead, etc.
- Ease of replacement of existing systems over a weekend with minimal downtime
- ECM fan module technology control options including airflow measuring and BMS interface as well as how to engineer for loss of use of an individual fan in the array without disruption to system performance
- Replacement stock availability and inventory, including voltage options and how to apply this technology in high static pressure systems
